19 February 2025

Onboarding software is one of the hottest aspects of legal technology – with the right systems in place, clients can sign up and be remotely onboarded in minutes or hours, rather than days or weeks. But how do you integrate it with your existing technology and what products are on the market? Former Innovation Editor of The Sunday Times Sean Hargrave talks to firms to find out more.

03 July 2024

Four firms share insights about the impact of generative artificial intelligence on how their business offering is evolving and adapting to a new way of working. Practitioners discuss an array of issues, ranging from the skillset needed of future trainees to how the pricing model of legal services will change. Discussion covers the importance of employee engagement and training and – perhaps most importantly – how to make sure that any lawtech you use adds real value to your business.
